"Be the change that you want to see in the world."

Summary

Developer focused on web systems with 5+ years of experience working with Java. Known to possess strong technical knowledge to deliver solid systems.

In the past 2 years i've been working as a Fullstack developer, with Angular 4+, JavaScript, Css and HTML for the frontend and JAVA, Spring Boot, Maven, Git and others for the backend.

Continued education has allowed me to stay ahead of the curve and deliver exceptional work to each employer I've worked for.
